

Table 3-4. Non-Project Agricultural Diversions from Sacramento River

Demand Unit	Diversion Arc	River Reach	River Mile	Bank	Area³ (acres)	Annual Diversion⁴ (TAF)
02_NA	D_SAC281_02_NA	Keswick to Bend Bridge	299 – 257	Right	800	1
04_NA ¹	D_SAC224_04_NA	Bend Bridge to Glenn-Colusa Irrigation District Intake	257 – 207	Right	2,200	1
08N_NA	D_SAC185_08N_NA	Glenn-Colusa Irrigation District Intake to Hamilton Bend	207 – 154	Right	7,200	14
08S_NA1	D_SAC146_08S_NA1	Hamilton Bend to Sycamore Slough	154 – 134	Right	15,600	8
08S_NA2	D_SAC129_08S_NA2	Sycamore Slough to Colusa Basin Drain Outfall	134 – 093	Right		21
21_NA	D_SAC081_21_NA	Colusa Basin Drain to Sacramento Bypass	093 – 066	Right	9,700	13
03_NA	D_SAC273_03_NA	Keswick to Bend Bridge	299 – 257	Left	2,200	5
05_NA ¹	D_SAC240_05_NA	Bend Bridge to Big Chico Creek	257 – 196	Left	2,400	7
09_NA	D_SAC185_09_NA	Big Chico Creek to Butte Slough Outfall Gates	196 – 141	Left	5,300	14
18_NA	D_SAC136_18_NA	Butte Slough Outfall Gates to Tisdale Weir	141 – 122	Left	1,800	5
19_NA ²	D_SAC109_19_NA	Tisdale Weir to Feather River	122 – 083	Left	0	20
22_NA	D_SAC075_22_NA	Feather River to American River	083 – 063	Left	2,200	1

Notes:

¹ Demand units 04_NA and 05_NA include a mix of non-project water users and Central Valley Project (CVP) settlement contractors. Diversions by CVP settlement contractors in these Water Budget Areas (WBA) were considered too small to warrant modeling as an independent demand unit.

² Demand unit 19_NA represents non-project water users. However, these diversions were considered too small to warrant modeling as an independent demand unit and were removed from CalSim 3.

³ Areas are very approximate and are an initial attempt to account for non-project agricultural diversions from the Sacramento River in CalSim 3.

⁴ Annual diversion amounts are very approximate and are an initial attempt to account for non-project agricultural diversions from the Sacramento River in CalSim 3. Given the uncertainty related to these diversions, they have since been set to zero in CalSim 3.

Key:

TAF = thousand acre-feet

Table 3-5. Non-District Agricultural Diversions from Feather River

Demand Unit	Diversion Arc	River Reach	River Mile	Bank	Area² (acres)	Annual Diversion³ (TAF)
11_SA ¹	None	Sutter Extension Water District to Fish Barrier Dam	37.9 – 67.0	Right	5,300	0
16_SA	D_FTR008_SA	Sutter Bypass East Levee to Sutter Extension Water District	7.6 – 37.9	Right	4,200	3
17S_SA	D_FTR003_SA	River mouth to Sutter Bypass East Levee	0.0 – 7.6	Right	200	5
12_SA	D_FTR059_12_SA	Honcut Creek to Fish Barrier Dam	44.8 – 67.0	Left	2,500	6
15N_SA	D_FTR045_15N_SA	Yuba River to Honcut Creek	27.7 – 44.8	Left	1,900	4
15S_SA	D_FTR028_15S_SA	Yuba/Sutter county line to Yuba River	10.8 – 27.7	Left	1,400	1
22_SA	D_FTR003_22_SA	River mouth to Yuba/Sutter county line	0.0 – 10.8	Left	3,000	7

Notes:

¹ Non-district diversions to WBA 11 were considered too small to warrant inclusion in CalSim 3.² Source: Maureen Sergent, SWP Analysis Office, DWR, personal communication, 9/29/2009.³ Annual diversion amounts are very approximate and are an initial attempt to account for non-district agricultural diversions from the Feather River in CalSim 3.

Key:

TAF = thousand acre-feet
